

# Logo usage guidelines

Default logo

This is Stoovo's default logo.

It is the one you'll see and use most of the times.

Stoovo

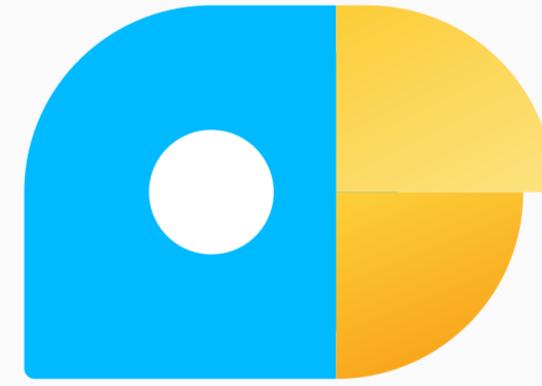

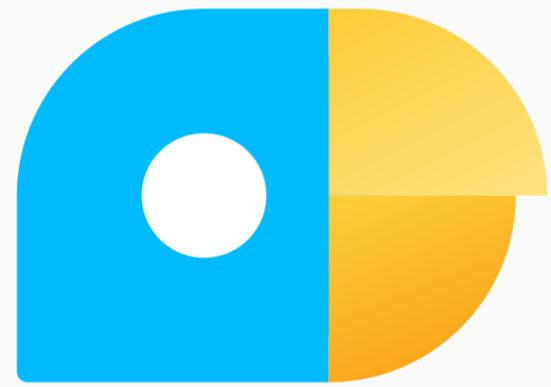

Safe area

The right amount of space around the logo helps it look just right  
by keeping other graphics at a safe distance.

## Logo Variants

At times default logo version won't feel right. Don't be shy and try one of additional two variants.

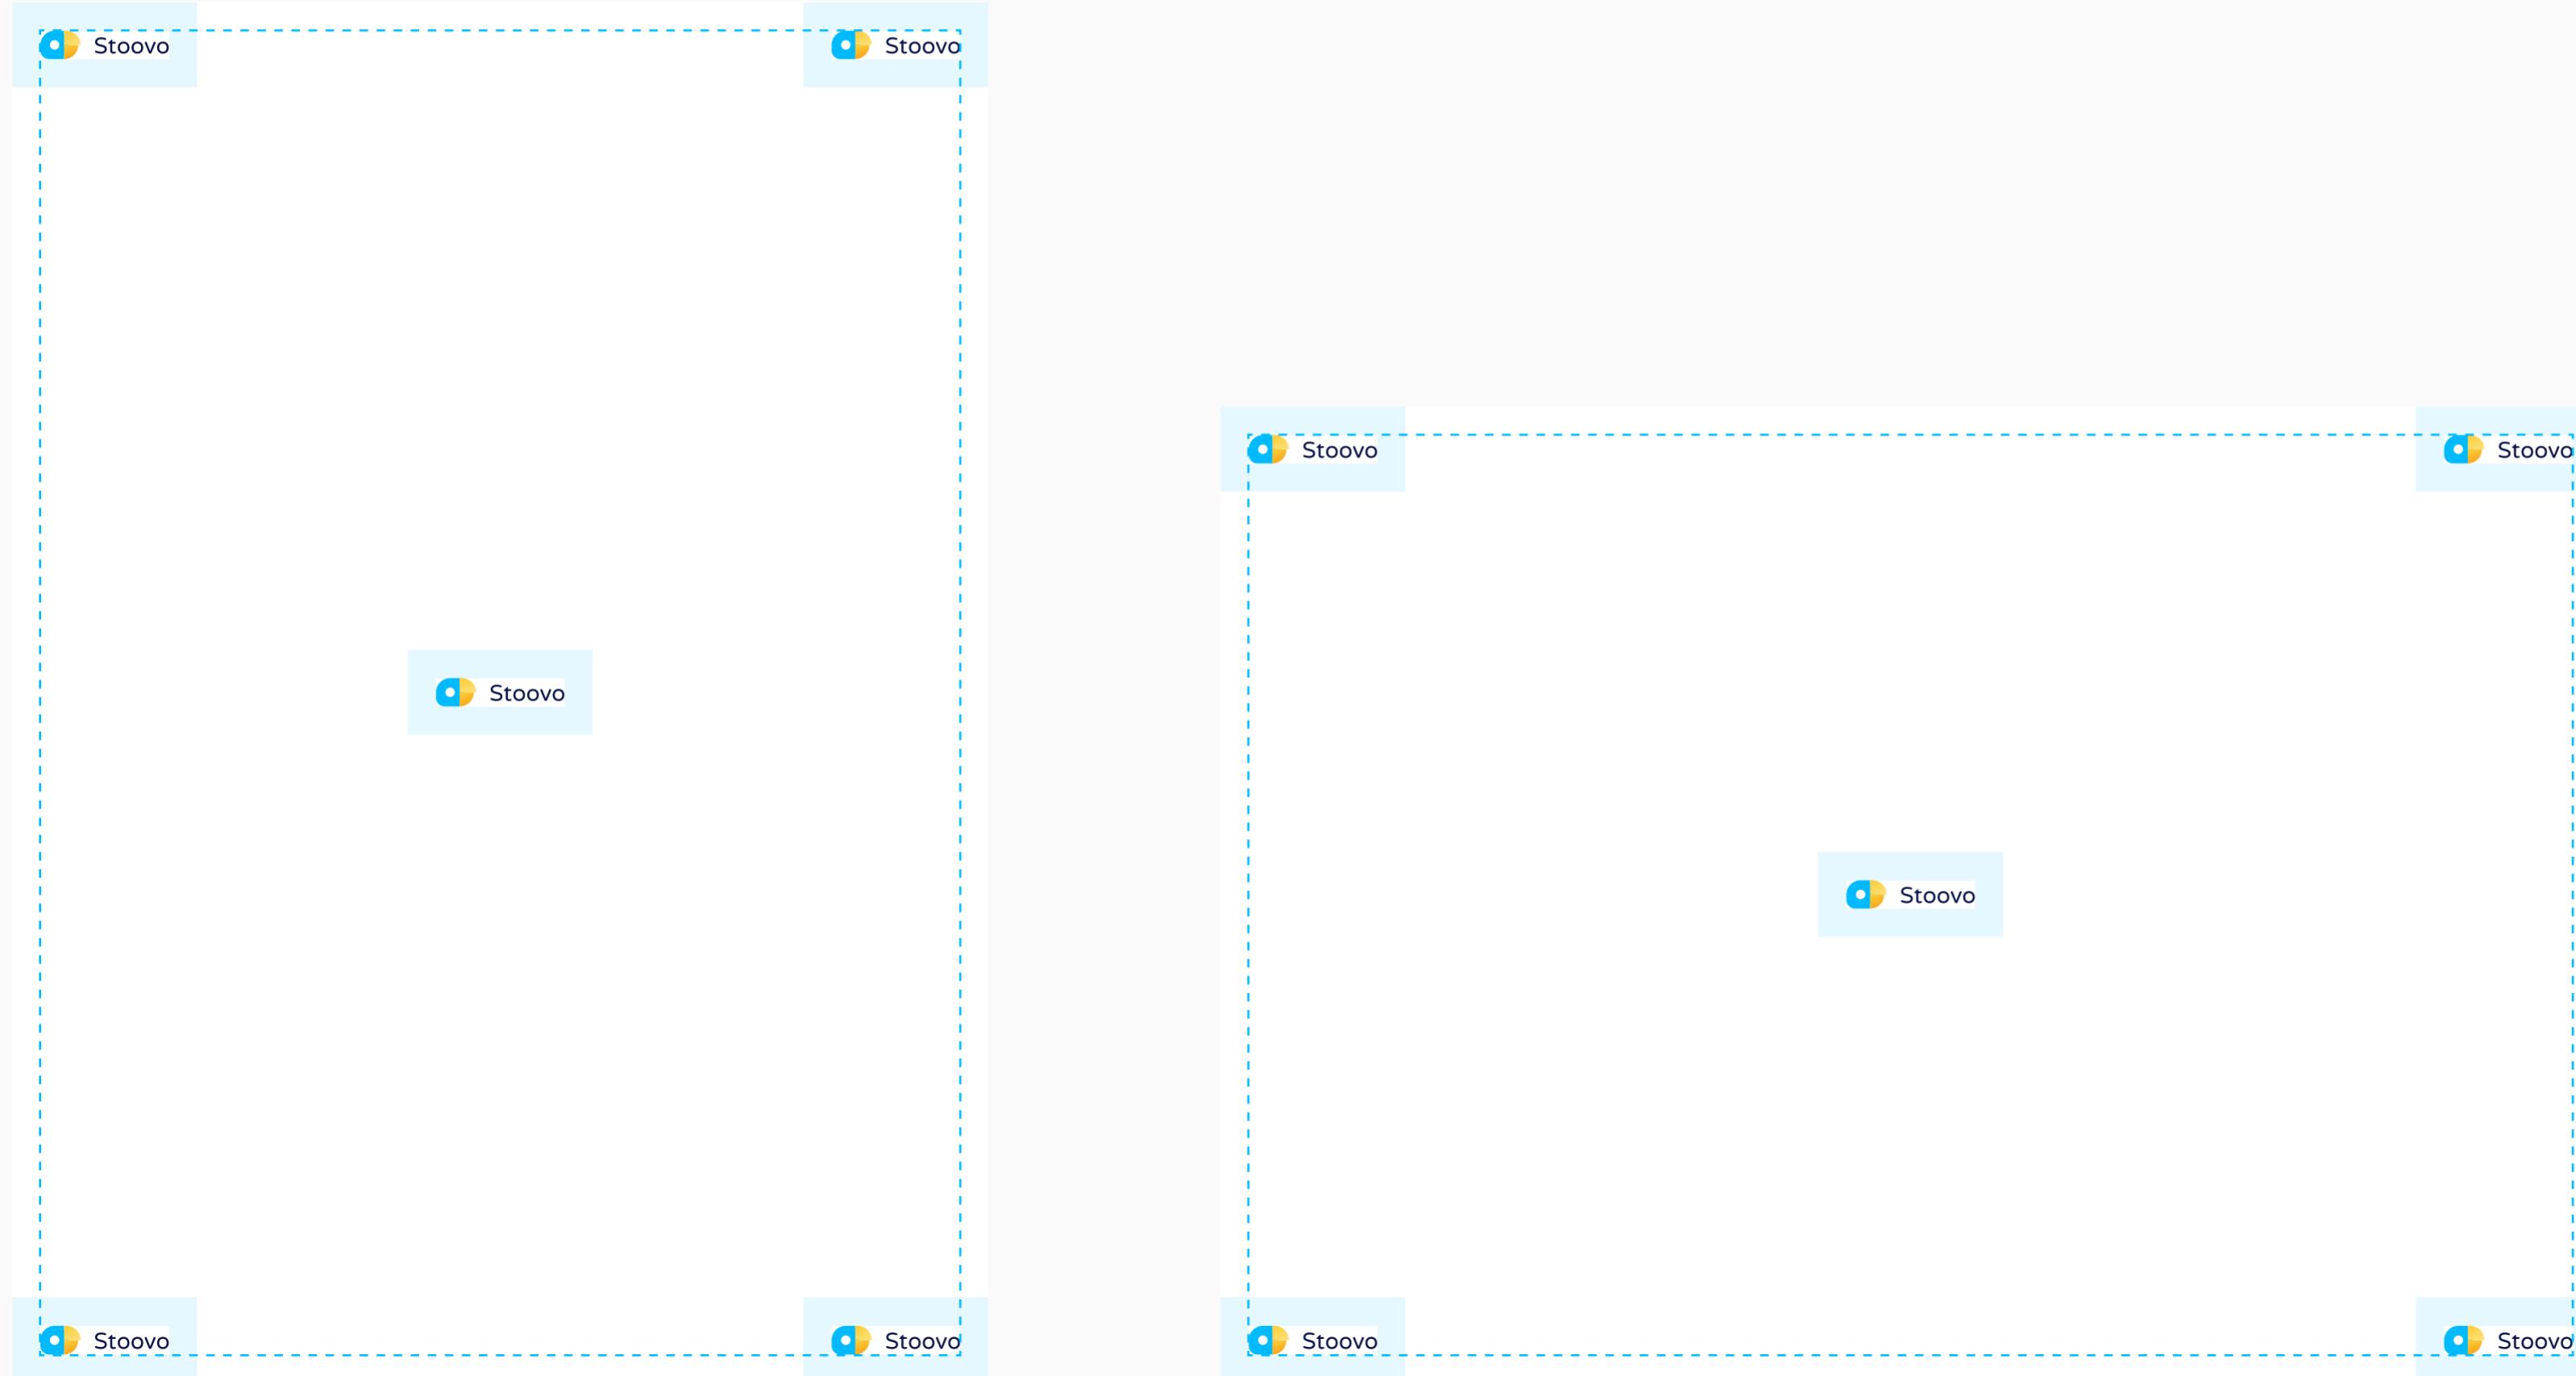

Stoovo

## Logo placement

*“Oh so I need this document/image done quickly, where do I place the logo?”*

You can never go wrong with these basic positions, don't forget the safe area around the logo.

## Logo variants

Logotype should have sufficient contrast against a background,  
make sure to use the correct version of the logo.
